Karthik Saladi

EDUCATION

Bachelor of Technology in Information Technology

2022-26

Aditya College of Engineering and Technology, Surampalem

CGPA: 7.89

TECHNICAL SKILLS AND INTERESTS

Languages: C/C++, Javascript, HTML, CSS, Java, Python, R

Web Dev Tools: VScode, Git, Github, Figma

Version Control: Git, Github

Frameworks: BootStrap, Django

Databases: MongoDB, Relational Database(MySQL), SQLite

Big Data Frameworks: Pyspark

API Development/Integration: Postman

System & Cloud Administration: Linux Administration, AWS Management

Relevant Coursework: Data Structures & Algorithms, Competitive Programming, Object Oriented Programming, Database Management System, Software Engineering.

Areas of Interest: Web Design and Development, Cloud Management.

EXPERIENCE

Software Developer Intern

July 2025 - Present

Pratishthan Software Ventures

Offline

- Undergoing hands-on training in Django and PySpark to contribute to an upcoming enterprise-scale project involving backend development and big data processing.
- Collaborating with the tech team to understand project architecture, data pipeline integration, and Django-based API development in a real-world production environment.

Java Intern

Aug 2024 - Nov 2024

Technical Hub

Offline

- Assisted 2nd-year students in mastering Object-Oriented Programming (OOP) concepts and Java fundamentals through an engaging and approachable teaching style.
- Guided students in debugging, solving programming exercises, and writing optimized code to improve their coding confidence and problem-solving skills.

AWS Development Internship

May - July 2024

Technical Hub

Offline

- Proficient in designing and managing AWS solutions with 99.99% fault tolerance, scalability for 100,000+ requests per minute, and optimized performance, reducing costs by 15% and improving efficiency by 20%
- Experienced in provisioning, monitoring, and automating cloud infrastructure using AWS services (EC2, S3, RDS, Lambda, etc.) and tools like AWS Management Console and CLI, boosting productivity by 30%.

PERSONAL PROJECTS

SmartCity Traffic Analytics System

[Source Code](#)

Spark-based application for real-time traffic analysis using RDDs, DataFrames and SQL

- The end-to-end analytics system ingests, processes, and aggregates multi-source traffic data—such as sensors, weather, road metadata, and accident reports—using distributed PySpark techniques. It enables real-time congestion alerts, accident hotspot detection, and infrastructure planning insights with 90% faster query execution compared to traditional systems.
- Skill-set Applied: PySpark (for distributed RDD & DataFrame processing), Spark SQL (for complex queries and joins), Python (for scripting and UDFs), MySQL (for structured data integration), React (for Frontend)

Personal Portfolio Web Page

[Live Demo](#) / [Source Code](#)

Showcasing skills and projects with a sleek, modern design.

- The responsive portfolio web page delivered an improved user experience across 100% of devices, including desktops, tablets, and smartphones. The page loading speed is improved by 30% for smoother interaction, thanks to efficient code written in HTML, CSS, and JavaScript
- Skill-set Applied: **JavaScript** (8.0% for interactivity), **CSS** (55.7% for responsive design and styling), and **HTML** (36.3% for structure).

Inventory Management System

[Source Code](#)

Java Based Application

- Developed a robust inventory management application using **Java Database Connectivity (JDBC)** and **Java GUI frameworks** like **SWING** and **AWT** for efficient operations.
- Automated inventory processes, including adding, deleting, and organizing items, leading to a 25% reduction in manual workload .
- Integrated with **MySQL** database to ensure secure and scalable data storage.

Elevate-Ed

[Live Demo](#) / [Source Code](#)

A dynamic web application designed to offer a highly personalized learning experience

- Developed an AI-driven personalized learning platform integrating modules like Dashboard, TextSummarizer, and Web Development Course to deliver tailored recommendations and enhance user engagement.
- Engineered full-stack components using PHP, Python, JavaScript, HTML, and CSS to optimize backend performance and scalability, achieving a 75% reduction in CPU utilization in the TextSummarizer module via a custom Windows script

CERTIFICATIONS

AWS Developer Associate	<i>AWS</i>
GitHub Administration	<i>Github</i>
Red Hat Certified System Administrator (RHCSA)	<i>Redhat</i>
IT Specialist in HTML & CSS, JAVA, Python	<i>Certiport</i>
ServiceNow Certified System Administrator	<i>ServiceNow</i>
ServiceNow Certified Application Developer	<i>ServiceNow</i>

COMPETENCY

Leetcode: Solved 700+ Problems, Max Contest Rating: 1,931.	<i>karthik_saladi</i>
GeeksforGeeks: Solved 500+ Problems, Max Contest Rating: 1867.	<i>karthik_saladi</i>
CodeForces: Specialist, Max. Rated: 1520.	<i>karthik_saladi</i>
CodeChef: 3 Star, Max. Rated: 1808.	<i>karthik_saladi</i>
Hackerrank: 6 Star in Problem Solving, 5 Star in C++ / JAVA / Python / SQL	<i>karthik_saladi</i>

ACHIEVEMENTS

Adobe GenSolve'24 Hackathon Top 50 among 100,000+ participants	<i>2024</i>
Technical Hub Web-a-thon 1st placed in the competition	<i>2023</i>
